This book presents the state of the art across the entire field of pediatric robotic surgery, including thoracic, abdominal, oncologic, gynecologic, and urologic procedures. Indications for each type of robotic surgery are clearly set out and technical aspects are described in detail, illustrating the patient’s position and explaining the robotic assessment and the optimal use of robotic instruments. Anesthetic issues and the management of robotic complications are discussed, and managerial aspects are also considered, with provision of helpful suggestions on how to approach robotic surgery in each pediatric department. For surgeons who wish to start using the pediatric robotic approach, simple illustrations of robotic assessment and principles of robotic surgery are included. Pediatric robotic surgery has undergone significant development in recent years, and the technology is now applied to a variety of pediatric diseases beyond urology. This book has been written by a group of world-renowned pioneers of pediatric robotic surgery and will appeal to pediatric surgeons of all disciplines, to residents, and to hospital general managers and medical directors.

The health of babies, children and young people is fundamentally different from that of adults, so their healthcare must reflect their unique needs and engage their parents, family members and communities.
New Zealand introduces nursing students to the care of infants, children, young people and their families in a range of clinical and community settings across Australasia. This third edition includes New Zealand content and an increased focus on families. New chapters cover health services available for Aboriginal, Torres Strait Islander and Māori children, the transition to parenthood for new families, children's sleep patterns and behaviour, and paediatric health in school settings. Case studies and reflective questions encourage students to develop critical thinking and problem-solving skills. Written by an expert team, Paediatric Nursing in Australia and New Zealand equips future nurses with the knowledge and skills to provide evidence-based care to babies, children and their families.

"Family-centered care (FCC) is a philosophy of care that acknowledges the importance of the family unit as the fundamental focus of all healthcare interventions (Chart 1-1). This model of care recognizes the collaborative relationship between the family and the professional care provider in the pursuit of being responsive to the priorities and needs of families when they seek healthcare"--Provided by publisher.

Special Needs & Cerebral Palsy is a new e-book in a collection of subject-themed e-books containing relevant key articles from Paediatrics & Child Health. The e-books provide a perfect source of revision for post-graduate exams in paediatrics and portfolio material for life-long learning. As well as mapping to the requirements of post-graduate training in paediatrics, these e-books also enable anyone with a short-term interest in a specific area to buy individual articles at a price-point that will give affordable access to all readers (from medical students to GPs and practitioners in related areas). The quality of user experience on mobiles, tablets and laptops will be an added bonus for learning on the move. About the journal The parent journal (http://www.paediatricsandchildhealthjournal.co.uk/) is a rolling, continuously updated review of clinical medicine over a 4-year cycle covering all the important topics for post-graduate exams in paediatrics. The journal’s articles are refreshed, updated, augmented or replaced as appropriate each time the subject is due for revision to provide a concise overview of knowledge and practice core to the curriculum. Each article is written by invited experts and overseen by the relevant subject specialist on the Board. A trainee representative on the Board ensures relevance and accessibility for exam candidates.

The Oxford Textbook of Palliative Nursing remains the most comprehensive treatise on the art and science of palliative care nursing available. Dr. Betty Rolling Ferrell and Dr. Judith A. Paice have invited 162 nursing experts to contribute 76 chapters addressing the physical, psychological, social, and spiritual needs pertinent to the successful palliative care team. Organized within 7 Sections, this new edition covers the gamut of principles of care: from the time of initial diagnosis of a serious illness to the end of a patient's life and beyond. This fifth edition features several new chapters, including chapters on advance care planning, organ donation, self-care, global palliative care, and the ethos of palliative nursing. Each chapter is rich with tables and figures, case examples for improved learning, and a strong evidence-based practice to support the highest quality of care. The book offers a valuable and practical resource for students and clinicians across all settings of care. The content is relevant for specialty hospice
Agencies and palliative care programs, as well as generalist knowledge for schools of nursing, oncology, critical care, and pediatric. Developed with the intention of emphasizing the need to extend palliative care beyond the specialty to be integrated in all settings and by all clinicians caring for the seriously ill, this new edition will continue to serve as the cornerstone of palliative care education.

Advance Care Planning (ACP) is an essential part of end of life care in the UK and most developed countries. It enables more people to live well and die as they would choose, and has significant implications for the individual person, their family and carers, and our wider society. In the context of an ageing population and increasing possibilities for medical interventions, ACP is a particularly important aspect of quality care. Expanded and fully updated throughout, this new edition gives a comprehensive overview of ACP and explores a wide range of issues and practicalities in providing end of life care. Written by experts from around the world, the book takes a comprehensive look at the subject by exploring the wide range of issues and practicalities in providing ACP; framing the purpose, process, and outcomes of these plans; and providing an important update on national and international research, policy and practice. Chapters also discuss values, goals and priorities, and include detailed case examples to aid best practice. This book is an invaluable resource for all clinicians involved in the caring for people in their final stages of life. It is of particular value to GPs, palliative care specialists, geriatricians, social care teams, researchers and policy leads interested in improving end of life care.

The Royal Children's Hospital Melbourne Paediatric Handbook is a trusted guide to managing common and serious childhood illnesses and disorders. This bestselling resource provides students and practitioners across medical, nursing, and allied health fields with authoritative and up-to-date information on a comprehensive range of pediatric topics, enabling readers to make the appropriate decisions at the point of care. Now in its tenth edition, the Handbook features clear illustrations and evidence-based diagnostic and management algorithms throughout, covering resuscitation and medical emergencies, prescribing and therapeutics, medicine, surgery, procedures, and much more. Contains accessible summaries of common and serious paediatric illnesses and disorders Aligns with latest clinical practice guidelines Features numerous full-colour photos, illustrations, diagrams, and clinical images Provides practical guidance on professional ethics and communication in paediatric consultations Includes updated information on refugee health and trans and gender diverse health Paediatric Handbook is an invaluable reference for medical practitioners, nurses and allied health professionals, as well as students and trainees.

"Children's palliative care is an evolving specialty and as such our knowledge base cannot remain static. This book constantly challenges the reader to critically analyze their own practices and beliefs within an evidence-based framework and as such makes a valuable contribution to the growing body of knowledge on this important subject." - Susan Fowler-Kerry, in the Foreword. This book caters for readers from different working environments and levels of experience. It is ideal for paediatric nurses with no specialist palliative care knowledge, and also for palliative care nurses with no specialist paediatric experience. Other healthcare professionals and therapists working with children, young people and their families
will also find this book invaluable. It will also be ideal for undergraduate and postgraduate health and social care students, and professionals involved in children's hospices, community services and charity groups. "This book captures not just the rapidly evolving evidence base, but also as many current developments as possible and applies them in a meaningful way to the care of infants, children, and young people living with life-limiting illness, and their families. It offers an overview of contemporary issues and helps to stimulate the type of dialogue that can bring about the actions that will make a real difference for the children, young people and families in our care." - Rita Pfund, in the Preface.

Book description This title is directed primarily towards health care professionals outside of the United States. Covering the full age and specialty spectrum this text brings together for the first time, individual chapters from among the most respected children's nurses. This textbook is rooted in child-centred health care within a family context and draws upon best contemporary practice throughout the UK and further afield. This innovative text harnesses new design parameters in enquiry-based/problem-based learning, providing up-to-date information on a wide range of topics. In an exciting addition each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding Professional conversation boxes enliven the text on the page and make it more interesting to dip into Suggestions for seminar discussion topics to help teachers Case studies help to relate theory to practice Prompts to promote reflective practice Activity boxes/suggested visits Evidence based practice boxes which highlight key research studies, annotated bibliographies including details of web-sites and full contemporary references to the evidence base Resource lists including recommended web-site addresses

This landmark text is the key resource for nurses working in the field of palliative care. Edited by renowned nursing experts, and written by a dynamic team of internationally known authorities in nursing and palliative medicine, the Oxford Textbook of Palliative Nursing covers the gamut of principles of care from the time of initial diagnosis of a terminal disease to the end of a patient's life and beyond. The text is distinctively developed to highlight the nurse's vital role as part of an integrated palliative care team. Various care settings are discussed including the hospital, ICU, home care, and hospice. Chapters focus on the practical aspects of nursing care, including symptom assessment, patient teaching, family support, psychosocial aspects of palliation, and spiritual care. New to the fourth edition are
chapters on the National Consensus Project for Quality Palliative Care Guidelines, palliative care of veterans, palliative care in rural settings, disaster situations, palliative care in Eastern Europe, and palliative care in the Philippines.

The second edition of Paediatric Nursing in Australia: Principles for Practice equips students with essential knowledge to become informed partners in the nursing care of children, young people and their families.

Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This book is an essential resource for anyone who works with children worldwide.

This book discusses the most important practical aspects involved in providing multidisciplinary Adolescent and Young Adult (AYA) services for cancer patients. It draws on international experience in several continents of establishing and running such services and provides a contemporary, practical approach to AYA care based on accumulated experience. It is of interest to those establishing or seeking to improve AYA services as well as those already caring for AYA cancer patients. Among topics discussed are incidence trends and treatment pathways, access to clinical trials for adolescents, transition from pediatric to adult services, psychological support and social care as well as survivorship and fertility. This book is of value of those establishing new services, those developing an existing service and those whose work includes the care of AYA patients. It is an important companion for pediatricians, oncologists as well as other medical, nursing and allied health professionals caring for Adolescents and Yound Adults with cancer.

Endorsed by the College of Emergency Nursing Australasia CENA is the peak professional association representing emergency nurses and has endorsed this text in recognition of the relevance it has to emergency nursing across Australasia. Led by an expanded editorial team of internationally recognised clinicians, researchers and leaders in emergency care, the 3rd edition of Emergency and Trauma Care for Nurses and Paramedics continues to be the foremost resource for students preparing to enter the emergency environment and for clinicians seeking a greater understanding of multidisciplinary emergency care. The text provides nursing and paramedicine students and clinicians with the opportunity to understand the best available evidence behind the treatment that is provided throughout the emergency care trajectory. This unique approach ultimately seeks to strengthen multidisciplinary care and equip readers with the knowledge and skills to provide safe, quality, emergency care. The 3rd edition builds on the strengths of previous editions and follows a patient journey and body systems approach, spanning the pre-hospital and hospital environments. Additional resources on evolve eBook on VitalSource Instructor resources: PowerPoint slides Test bank Paramedic test bank Case study questions and answers Image collection Additional case studies with answers and rationales Additional paramedic case studies with answers and rationales Student and Instructor resources: Additional case studies Additional paramedic case studies Videos Expanded editorial team, all internationally recognised researchers and leaders in Emergency Care Chapter 6 Patient safety and quality care in emergency All chapters revised to reflect the
most up-to-date evidence-based research and practice. Case studies and practice tips highlight cultural considerations and communication issues. Aligns to NSQHSS 2e, NMBA and PBA Standards. An eBook included in all print purchases.

Care Planning in Children and Young People’s Nursing addresses a selection of the most common concerns that arise when planning care for infants, children and young people within the hospital and community setting. Clear and detailed, this text reflects both the uniqueness and diversity of contemporary children's nursing and utilizes images and case studies to provide a holistic insight into the practice of care planning through the reporting of best available evidence and current research, policy and education. Divided into sections for ease of reference, Care Planning in Children and Young People’s Nursing explores both the theory and practice of care planning. Chapters on the principles of care planning include issues such as managing risk, safeguarding children, ethical and legal implications, integrated care pathways, interprofessional assessment, and invaluable parent perspectives. Additional chapters on the application of planning care examine the practical aspects of a wide range of specific conditions including cystic fibrosis, obesity, cardiac/renal failure and HIV/AIDS. Each chapter is interactive, with questions, learning activities and points for discussion creating an engaging and enquiry-based learning approach. Care Planning in Children and Young People’s Nursing is a definitive resource, reflecting innovative practice which is suitable for undergraduate and postgraduate nurse education.

This is the first UK-based guide to Advance Care Planning, and provides practical advice on how this can be implemented by all professionals involved in end of life care, including GPs and specialists outside palliative care who are increasingly treating patients at the end of life.

The definitive guide to revision for the MRCPCH examination. 25 Chapters covering all areas the MRCPCH syllabus in note format. Concise presentation of information, with hints and tips. Vital facts presented in an attractive user-friendly format. Diagrams, pie charts, lists, illustrations and bullet points to aid learning.

Handbook of Supportive Oncology and Palliative Care is a practical guide to providing evidence-based and value-based care to adult and pediatric cancer patients experiencing severe symptoms and stressors due to cancer diagnosis, cancer treatment, and comorbid conditions. This accessible reference provides the art and science behind the whole-person and family approach to care by delivering the best practices to relieving a cancer patient’s symptoms across physical, psychosocial, and spiritual dimensions. Unlike other resources, this book covers all dimensions of palliative care but with a special emphasis on primary palliative care. Part One of the handbook provides the essential background and principles of supportive oncology and palliative care, including chapters on understanding the adult and pediatric patient and family illness experience, the roles and responsibilities of the palliative care team, and the art of the palliative care assessment interview. Part Two covers symptom management and includes ten chapters considering the major physical and psychosocial symptoms a cancer patient may face—neurologic, cardiac, respiratory, gastrointestinal, genitourinary, psychiatric, sleep and fatigue, pain, and psychosocial and spiritual distress. Part Three addresses special considerations and issues that an oncologist, physician,
nurse or other healthcare provider often face in these settings, including chapters on intimacy, sexuality, and fertility issues, grief and bereavement, running a family meeting, care for the caregiver, and survivorship. Written by expert clinicians, this state-of-the-art handbook is a necessary resource for any oncologist, nurse, primary care physician, psychosocial expert, or related practitioner who endeavors to improve quality of life and provide healing to those suffering from cancer and its treatment. Key Features: Provides the binding principles of palliative care for pediatrics, adults and families from diverse cultures and spiritual beliefs Easy-to-read format makes extracting content fast and convenient for both the clinical and educational setting Guides the clinician and practitioner through the palliative care assessment process, including the appropriate questions for the palliative care interview

This book is a printed edition of the Special Issue "Pediatric Palliative Care" that was published in Children

This comprehensive clinical practice manual emphasises evidence-based best practice, focusing on inter-disciplinary care of the child in hospital and community settings. The additional needs of neonates and adolescents are highlighted.

This manual enables individuals working in children’s palliative care (CPC) globally to learn through engaging real-world cases. The aim is to provide a clinical case-based resource that is globally relevant and accessible to those working in CPC. Drawing on case histories from around the world that reflect key issues and elements of CPC, it provides a practical approach grounded in experience. It addresses multidisciplinary care in the management of children and their families; discusses cases from an international perspective, and shares examples from a variety of countries, utilising cases across a range of ages and conditions, demonstrating holistic care. It represents the first case-based manual on global CPC and is endorsed and promoted by the International Children’s Palliative Care Network (ICPCN). Children’s palliative care is a rapidly developing field, both in the UK and internationally. The provision of CPC varies considerably, with provision often being insufficient, and over 65% of countries having no recognised CPC service provision whatsoever. As such, while there are an estimated 21.6 million children who require palliative care, in many areas of the world, CPC is poor or non-existent, and children are treated like little adults without their distinctive needs being recognised or understood. There is also a dearth of literature on CPC, hence this clinical case-based manual fills a gap in the market, and is aimed at a global audience, making it a unique text in the field.

The first book about Guided Participation written for nurses This authoritative publication delivers an in-depth examination of Guided Participation (GP), a dynamic process of teaching and learning that parents and guardians have used for generations to help their charges become self-reliant. GP is helping another person become competent by providing expertise working alongside the learner. For the nurse specifically, this means educating and working alongside parents and children within an environment that supports health. Consistent with client- and family-centered practice, this fresh approach to nurse/client teaching is drawn a broad span of disciplines, including education, social and cultural anthropology, relationship-based attachment-caregiving theory, and developmental science.
Written for students and practitioners who wish to incorporate GP into their practice, and for managers, administrators, and policy makers who support its implementation, this resource demonstrates the value of GP as a new and emerging health care model that integrates care across health care settings. The text describes, step-by-step, how to practice GP discusses support systems to maintain GP past the initial treatment. With abundant case studies, examples and research findings, chapters analyze how GP can promote health, prevent acute and chronic illness, and adjust old patterns of living and behaviors. Key Features:

- Includes video clips that illustrate how guided participation is applied in a variety of clinical practice settings
- Provides access to self-directed online instruction
- Links to online journal, case studies, additional chapters, and references
- Features downloadable parent checklists and teaching guides
- Discusses effective application of Guided Participation to all aspects of pediatric nursing care in a variety of practice settings
- Includes numerous case studies and examples with specific components identified to help readers learn theory and related concepts
- Learn to apply guided participation by joining the case-based online course offered at University of Wisconsin-Madison!

The Textbook of Interdisciplinary Pediatric Palliative Care, by Dr. Joanne Wolfe, et al., aims to inform interdisciplinary teams about palliative care of children with life-threatening illness. It addresses critical domains such as language and communication, symptoms and quality of life, and the spectrum of life-threatening illnesses in great depth. This comprehensive product takes a first-of-its-kind team approach to the unique needs of critically ill children. It shows how a collaborative, interdisciplinary care strategy benefits patients and their families. If you deal with the complex care of critically ill children, this reference provides a uniquely integrated perspective on complete and effective apply interdisciplinary perspectives to provide the most comprehensive care. Care for patients and their families with an integrated approach designed to address physical, psychological, social, and spiritual needs. Focus on the self-care of clinicians in order to be more expert in direct patient care. Understand the importance of linking community palliative care with hospital-based palliative care. Access the full text online with regular updates along with a host of valuable resources such as education modules, research articles, patient handouts, and audio/visual materials.

Implement consistent terminology for use by the entire palliative care team. Reflects the collaborative approach necessary to provide optimal care for children and their families.

This book offers a comprehensive overview to chronic illness care, which is the coordinated, comprehensive, and sustained response to chronic diseases and conditions by a range of health care providers, formal and informal caregivers, healthcare systems, and community-based resources. Using an ecological framework, which looks at the interdependent influences between individuals and their larger environment, this unique text examines chronic illness care at multiple levels and includes sections on the individual influences on chronic illness, the role of family and social networks, and how chronic care is provided across the spectrum of health care settings; from home to clinic to the emergency department to hospital and residential care facilities. The book describes the organizational frameworks and strategies that are needed to provide quality care for chronically ill patients, including behavioral health, care management,
transitions of care, and health information technology. The book also addresses the changing workforce needs in health care, and the fiscal models and policies that will be required to meet the needs of this population, with a focus on sustaining the ongoing transformation in health care. This book acts as a major reference for practitioners and students in medicine, nursing, social work, allied health, and behavioral medicine, as well as stakeholders in public health, health policy, and population health.

"From its beginning with Eugene Stead, MD at Duke University, the Mission of the Physician Assistant profession has been to create, increase or expand health care access in areas and populations with the greatest need. 1 Dr. Henry Silver's Child Health Associate Program at the University of Colorado is a good example as is Dr. Hu Myer's Alderson Broaddus Program which serves isolated rural communities in West Virginia. 2 Dr. Richard Smith's MEDEX Program at the University of Washington was also designed specifically to serve rural and medical underserved communities of the Pacific Northwest. 3"

Originally emanating from presentations at an international conference, this text brings together research and practice development from three perspectives: practice, management and education. Within these three sections the book presents a series of chapters written mainly by practitioners, but some in collaboration with academics. At the end of each section there is a commentary by a practitioner, manager or researcher, which aims to offer a helpful critique on the papers in their section, guiding the reader to consider other areas of research and practice development. At a time when practitioners are being called to produce and use evidence in their practice, this book should offer a valuable contribution to that evidence base.

Paediatric Neurosurgery for Nurses: Evidence-based care for children and their families provides accessible and up-to-date information for nurses working in paediatric neurosurgery. Referring throughout to the evidence-base for care and interventions, this complex area is described and explained in a meaningful and easily understandable way. The text includes chapters on the underpinning knowledge and principles for the care of children who need neurosurgery as well as the following common neurological problems: Hydrocephalus Traumatic Brain Injury Craniosynostosis Brain Tumours Surgical management of epilepsy in children Cerebrovascular disorders Neural tube defects The complexity of the nervous system and principles of care are presented logically with points to consider and essential care clearly highlighted and, where available, evidence-based practice is presented. It includes a range of pedagogical features, such as chapter overviews and summaries, diagrams, sample care plans, text boxes and a glossary. This book is essential reading for pre-registration nursing students and newly qualified nurses but will also be of use to allied healthcare professionals working with children and young people requiring neurosurgery.

Canadian Maternity and Pediatric Nursing prepares your students for safe and effective maternity and pediatric nursing practice. The content provides the student with essential information to care for women and their families, to assist them to make the right choices safely, intelligently, and with confidence.
Drawing on her family's own experiences and those of other parents facing the death of a child from illness or a life-limiting condition, Sacha Langton-Gilks explains the challenges, planning, and conversations that can be expected during this traumatic period. Practical advice such as how to work with the healthcare professionals, drawing up an Advance Care Plan, and how to move care into the home sit alongside tender observations of how such things worked in her own family's story. The book also includes a template person-centred planning document, developed by experts in the field. Empowering and reassuring, this book will help families plan and ensure the best possible end-of-life care for a child or young person.

Children and Young People’s Nursing at a Glance, is the perfect companion for study and revision for pre-registration children’s nursing students from the publishers of the market-leading at a Glance series. Divided into seven sections it explores assessment and screening, working with families, the newborn infant, the developing child, child health policy, nursing the sick child and young person and chronic and life-limiting conditions. This comprehensive book is an invaluable resource for pre-registration nursing students as well as newly qualified nurses wanting to consolidate and expand their knowledge of children and young people’s nursing. Breaks down complex aspects of child health care in an accessible and un-intimidating way The perfect revision and consolidation textbook Linked closely with the NMC standards for pre-registration nursing education, and the essential skills clusters framework Highly visual colour presentation, with approximately 130 illustrations Includes boxes, summary boxes, key points and recommendations for practice to improve the learning experience Supported by a companion website featuring over 500 interactive multiple choice questions (www.ataglanceseries.com/nursing/children) Available in a range of digital formats - perfect for 'on the go' study and revision

This textbook details the nursing care of babies with life limiting conditions and sets the context within the philosophy of internationally collaborative neonatal palliative care emphasising emotional and practical support for their families. Currently, increasing interest from nursing and medical fields regarding palliative care for babies in the antenatal and neonatal period is evident. This innovative and unique text provides experienced nurses and student nurses alike with realistic guidance in caring for babies with palliative care needs, alongside the crucial support for their families and identifies important strategies for professional self care. Nursing experts in this field collaborated to develop a reference book which supports holistic and integrated clinical practice. Parents' experiences of what they consider helpful or not so helpful are interwoven throughout the chapter. There is currently no other textbook which offers the above information and guidance specifically for nurses and allied health professionals. As such this book will appeal to all nurses and health professionals working within the neonatal palliative care specialty in a global context.

This issue of Child and Adolescent Psychiatric Clinics, guest edited by Drs. David Buxton and Natalie Jacobowski, will cover several important aspects surrounding Dealing with Death and Dying amongst a child and adolescent population. This unique volume will include topics such as, Talking to adolescents about their death, Continuing to parent when a parent has a terminal illness, Supporting children and
families at a child's end of life, Collaboration with a Pediatric Palliative Teams, Current gaps and opportunities to improve care for children at the end of life, Ethical issues around pediatric death, Making meaning after losing child, Family bereavement after a child dies, The role of art therapy in bereavement care of children, Helping healthcare staff cope after a child dies, How do providers deal with a child patient who completes suicide, Managing a suicide in a school system, Perinatal Death, and Social media consequences of pediatric death.

Looking after children with life-limiting conditions can be very difficult for both parents and health care professionals. This second edition of Paediatric Palliative Medicine is full of easily-accessible, detailed information on medical conditions and symptoms and includes specific management plans in order to guide the practicing clinician through treatment of children requiring palliative care. Using the bestselling Oxford Specialist Handbook format to deliver practical and concise information, this handbook facilitates bedside delivery of effective palliative medicine to children by professionals who have not trained or had experience of caring for the dying child, as well as for students and trainees interested in paediatric palliative care. It includes detailed information on symptom control and the philosophy and models that support delivery of palliative medicine to children, while also covering practical delivery of palliative medicine relating to other professionals and to families, and the learning and coping skills required in palliative care. It also contains a quick-reference drug formulary. Fully updated with an expanded formulary and a new chapter on the intensive care unit, this new edition continues to be the authoritative reference tool in paediatric palliative care.

Children and Young People's Nursing provides a comprehensive overview of the issues facing children's nurses today. It focuses on developing best practice and implementing high quality care. This book covers the wide range of general and
specialist care settings in which children and young people's nurses work, including schools, the community and mental health. Written by a team of experts from across the UK, it emphasizes throughout the fundamental principles of contemporary children's nursing, such as family-centred care, safeguarding and the need for a culturally sensitive and rights-based approach to care. This is an essential text for all children's nursing students, as well as a useful reference for qualified nurses looking to update their practice. Key features All chapters are underpinned by current policies and the latest research Key points, reflection points, principles for practice boxes and case studies to aid learning Concludes with a section on building your portfolio and advancing your practice and career

"Learning from personal and from other's experience is a fundamental learning tool in medicine. The aim of this book is to use challenging cases in the management of critically ill children, from presentation to transfer and admission to PICU to identify key learning from others' experience. It provides an opportunity to participate in the resuscitation, stabilisation and transfer virtually, without the stress associated with having the critically ill child and distressed family in front of you. It provides an opportunity to consider how you would have done things, perhaps differently, and review what was done. It has the benefit of seeing the case through from start to finish, so that personal management strategies applied can be reviewed without impact to the child. It also gives opportunity to learn from the good practice or insight of others and to take this learning forward, to ensure that the next child with similar presentation has the best outcome"--

This sixth edition of the acclaimed and award-winning ‘Sunflower book’ comprehensively covers the undergraduate curriculum in paediatrics and child health. Topics are made accessible with numerous colour images, diagrams and case studies, and revision is facilitated by key points and summary boxes. This has made the book a firm favourite of medical students as well as trainees approaching clinical speciality exams, both in the UK and internationally. Highly illustrated with hundreds of colour images and diagrams to assist learning. Case studies to explain important or complex clinical problem Key learning points: the editors identify the most clinically relevant facts. Summary boxes to aid revision.

Scott-Brown's Otorhinolaryngology is used the world over as the definitive reference for trainee ENT surgeons, audiologists and trainee head and neck surgeons, as well as specialists who need detailed, reliable and authoritative information on all aspects of ear, nose and throat disease and treatment. Key points: accompanied by a fully searchable electronic edition, making it more accessible, containing the same content as the print edition, with operative videos and references linked to Medline highly illustrated in colour throughout to aid understanding updated by an international team of editors and contributors evidence-based guidelines will help you in your clinical practice features include key points, best clinical practice guidelines, details of the search strategies used to prepare the material and suggestions for future research new Endocrine section. Scott-Brown will provide trainee surgeons (ENT and Head and Neck), audiologists and ENT physicians with quick access to relevant information about clinical conditions, and provide them with a starting point for further research. The accompanying electronic edition, enhanced with operative videos, will enable both easy reference and accessibility on the move.
